

# We Make Better Buildings

High quality, custom-engineered precast concrete products for commercial and industrial builds in Western Canada.

## Pre-Insulated Concrete Panels:

- Structural and architectural pre-insulated concrete panels in various sizes (8" to 12" thick).
- Built in a controlled environment, creating unsurpassed quality.
- Various R-values available depending on project specifications.

## Double Tees:

- Pre-stressed concrete products for parking structures, floors, roofs and bridges where heavy loads must be supported, or long spans are required.
- Three different sizes depending on application and load.

## Concrete Beams & Columns:

- Primarily used as support structures, beams act as horizontal ties between footings and pile caps, or as significant structure supports that can be inverted to form columns.
- Custom design, sizes and specifications are available depending on engineering needs.

## Custom design & manufacturing

In house drafting team to prepare accurate drawings, while respecting tight schedules.

## Installed on time, every time

On-time installs with our own team without delays, for more accuracy and accountability.

## Proven performance

Strong and durable concrete products, custom-engineered to last.

## Flexible partnerships

We'll complete the work you need, from supply and install to complete lock up.

## Other precast elements available

- Utility Vaults
- Utility Pads
- Lego Blocks
- Concrete Fences
- Jersey Barriers
- Solid Walls (4" to 10")

Need a custom design? Tell us what you've got in mind. We'll use our experience and flexibility to provide you with a solution that's functional (and economical).

## Searching for a Sandwich Panel Alternative?

Superior Walls® are an innovative, precast concrete wall that offers unsurpassed quality, cost efficiency and innovation for building envelopes. As with sandwich panels, the walls are manufactured in a factory-controlled setting and delivered to the job site, where the prefabricated panels are lifted into position with a crane and carefully bolted together and sealed.

**Reduced construction time**

**Improved durability and moisture resistant**

**Reduced cost compared to other insulated panels**

**Sustainable and environmentally friendly**

## Structural Precast

Structural Precast serves Western Canadian residential and commercial builders by providing precast concrete products that are custom manufactured, installed rapidly, and proven to deliver more comfortable and sustainable buildings. Based in Calgary and Claresholm, Alberta, and a proud CPCI member, Structural Precast is an expert-led manufacturing company with over 300 customers.
